

TSC INSPECTION SYSTEMS

ELECTRONICS DESIGN ENGINEER

TSC Inspection Systems develop and manufacture advanced instruments and systems for non-destructive testing (NDT) and stress measurement. With over 20 years experience as supplier to the off-shore and petro-chemical production industries TSC have gained a reputation as a high quality, reliable, leader in the field of electromagnetic testing technology.

TSC are looking for talented individuals to join our product development team producing 'state of the art' NDT instrumentation for worldwide markets.

Applicants should hold a good degree, or equivalent, in Electronics and/or Electrical Engineering and, having a flair for circuit analysis, will be keen to become involved in analogue and digital design processes. Candidates should also have an aptitude for firmware development primarily in C and assembly language.

TSC offer a competitive benefits package and friendly working environment. Apply to join us at our Milton Keynes office by sending your application to:
